

Simple, Efficient Intermodal Rail

Echo's intermodal capabilities maximize relationships with top railroads and drayage providers to give you the best rates, container availability, transit and system capacity.

Echo's Network & Technology Ensure Capacity for Your Shipments

- Competitive agreements with the top North American intermodal providers
- Access to one of the largest, most comprehensive networks of drayage providers
- Rail and origin/destination drayage from your door to final destination
- Quick pricing
- Advanced technology and electronic tracking

See Savings with the Echo Intermodal Rail Solution

- Unbundled rates for greater savings
- Long-term pricing available for volume moves
- Air-ride DST containers prevent damage

Intermodal Benefits

- Lower transportation costs over longer distances
- Decreased chance of freight damage with air-ride cars
- Electronic shipment updates via EDI
- Numerous equipment choices, which provide lower rates (particularly for high-density freight)
- Exclusive use of equipment means no mixed freight
- Reduced highway congestion and road degradation

When to Ship Rail

- Your shipment is traveling over 500 miles
- Your shipment weighs under 43,500 lbs.
- Your shipment can be loaded into a container/trailer up to 53 feet in length
- You need a more flexible transit schedule

Book your next intermodal rail shipment with Echo.
