

# Simplified Solutions for International Air & Ocean Shipments

Echo Global Logistics' shipping expertise allows us to navigate the global marketplace with ease, ensuring your goods end up where you need them.

## Better Supply Chain and Transportation Management

Trust Echo's international import/export team to manage your shipments with confidence and care using your existing transportation model. Our custom-tailored solutions and shipping expertise allow Echo to:

- Leverage our network of international air and ocean freight partners to meet complex shipping needs
- Move your international freight domestically, in the optimal manner, to its final destination
- Provide access to additional services and data, including key performance indicators, request for quotation management, and special cargo project management
- Bill pay and audit support are also available as part of the Echo managed transportation service.

## Simplified Import and Export Compliance Programs

Echo provides transportation management support for the full lifecycle of your international shipment. Our expert team and proprietary technology ensure coverage with:

- An agent network in every major market
- Tariff and customs compliance services
- Information systems and data analysis
- Warehousing and distribution services
- Customs brokerage and cargo insurance
