

Partial Truckload Simplified

With the Echo Global Logistics partial truckload solution, you can save up to 35% on shipments that are too big for LTL but too small for full truckload. Our industry relationships give us access to low rates and unique capacity you can't get on your own.

The Echo Partial Truckload Solution Is Tailored to Your Needs

- One of the largest partial truckload networks in the country
- Less handling of your freight compared to LTL, with load-to-ride options available (the truck that picks up is the truck that delivers)
- Account- and commodity-driven SOPs to ensure high-quality service
- Block and brace or load lock options
- Value-add services (e.g. white glove delivery, lift gates, guaranteed a.m. delivery)
- Increased visibility into each shipment

Direct Savings Delivered to Your Business

- Simplified billing
- Economical rates
- One of the largest partial truckload sourcing teams in the industry
- Up to 35% direct savings over full truckload for qualifying shipments
- Less handling, which results in fewer claims

Ship Partial Truckload If You Are Doing Any of the Following

- You ship 5,000 lbs. or more using an LTL carrier
- You ship 10,000 lbs. on a full truckload because it's cheaper than LTL
- Your freight is light but takes up enough space to make LTL cost-prohibitive
- You ship 10 or more pallets as a full truckload but don't use all the space
- Your LTL carrier interlines your freight, resulting in higher costs and transit times

With partial truckload expertise unmatched in the industry, the experienced Echo team provides access to low rates and a partial truckload solution tailored to your needs. Echo makes outstanding service and communication the top priority on each shipment.

Book your next partial truckload shipment with Echo.
