

Nationwide Warehousing Solutions

Through its acquisition of Roadtex, Echo Global Logistics offers a network of warehouses enabling manufacturers to expand their warehousing footprint and packaging capabilities to lower storage and handling costs with best-in-class delivery.

A Broad Network of State-of-the-Art Warehouses:

- Nationwide footprint of more than 2 million square feet of temperature-controlled warehousing space across 32 strategically located facilities, serves 85% of the U.S. with next day service
- Food grade and FDA registered facilities with zones for staging inbound and outbound products, repacking and other value-added services, cross-dock distribution
- Facilities comply with food grade, pharmaceutical, and confectionery product requirements, monitors high and low temperature levels in real time
- State-of-the-art technology allows manufacturers to expand warehousing footprint and packaging capabilities, lowers storage and handling costs

Full-Service Warehouse and Shipping Solutions Offered:

- Pallet storage, pick/pack, repacking, shrink wrapping and overwrapping, UPC and standard labeling, e-commerce, and display building
- Zones in each facility for staging, repacking, kitting, and cross dock distribution
- Web-based warehouse management system (WMS) to manage orders and inventory via EDI including expiration dates and shipment tracking
- Reporting provided to all clients from product receipt at facilities through final delivery

We do the simple and the complex very well when it comes to warehousing solutions and can scale with the needs of small and large companies with fast implementation. Need a warehouse?
