

Drive Actionable Insights. Recover Costs. Ship Smarter.

EchoParcel's Audit & Technology solutions give you complete control over parcel spend, combining powerful TMS capabilities, automated invoice auditing, and carrier-agnostic reporting to uncover savings, improve visibility and streamline operations.

Audit Every Invoice. Validate Every Shipment. Optimize Every Dollar.

EchoParcel combines enterprise TMS technology with automated auditing and advanced reporting to eliminate billing discrepancies, recover refunds, and deliver the insights you need to optimize your parcel strategy.

EchoParcel TMS

Connect Carriers and Order Data

Seamlessly connect to unlimited carriers and unify order data for complete visibility.

Customized, Automated Routing Rules

Leverage smart routing, real-time rate shopping, and address validation to get the best service at the best rate.

Ship Optimized, Every Time

Generate labels automatically and process high volumes efficiently — with accuracy you can count on.

EchoParcel Audit & Analytics

Parcel Service Audit

Automatically audit parcel invoices and recover refunds for late deliveries.

Parcel Rate Audit

Identify billing errors and validate contracted rates, discounts, and dimensional charges.

Parcel Reporting

Centralize parcel data across carriers and uncover insights to optimize shipping decisions.

The Echo Team

Parcel Expertise

Our parcel experts combine deep parcel and multimodal supply chain knowledge to help you optimize your shipping strategy.

Dedicated Support

We manage the operational complexity of parcel shipping, so your team can focus on what matters most.
